DETAILED ACTION

Election/Restrictions

1. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

I. Claims 1, 3-24 and 44-45 (Invention I), drawn to a drawn to a micro- reactor.

II. Claims 25 and 27-43 (Invention II), drawn to a method of determination a reaction or properties of materials.

2. The only technical feature, common for the inventions of the above listed groups, is a reactor with one or more controllable fluid supplies. The feature does not contribute any novelty over the prior art (see, for example, Figures 2-3 of Pace, US 4908112 showing reactor 32 connected to supply reservoir 36, the fluid flow being controlled by electrodes 12, 40). Therefore, the unity of inventions is lacking.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. The restriction is required under 35 U.S.C. 121 and 372.

3. A telephone call was made to Richard Oney on April 8, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
